## EDUCATION

### ● 2020 - 2024

Bachelor Of Technology (CS)  
SAGE University  
Score: 8.5 CGPA

### ● 2019- 2020

Senior Secondary CBSE  
Indus World School  
Score: 86%

## SKILLS

Python

JavaScript

SQL

Machine Learning

CSS

React.js

HTML

Web Scrapping

## LANGUAGE

English

Hindi

## CURRICULAR

- CR (Class Representative)
- IT Quiz Coordinator

# ABHISHEK JAIN

## ABOUT ME

Expert in Python programming language with a focus on AI and machine learning, I have built several projects in these areas. Recently, I have also been exploring the world of web development, by learning JavaScript, CSS, HTML and React where I see a great opportunity to apply my skills and create innovative solutions.

## INTERNSHIP

### ● CORIZO Machine Learning Intern

Developed and analyzed machine learning models for real-world applications, collaborating with experts to gain hands-on experience in building predictive models and working with large datasets. Gained a strong foundation in machine learning algorithms and techniques, enhancing problem-solving and analytical skills.

## PATENT PUBLISHED

### ● Attendance System Using Face Recognition

Developed a Python-based Attendance System using Face Recognition library to automate attendance marking, showcasing proficiency in computer vision and machine learning and used Tkinter for giving it GUI. Also deployed in Jetson Nano

## PROJECTS

### ● React Portfolio

Implemented a React-based portfolio showcasing projects, skills, and certificates. Developed user-friendly UI/UX design using modern front-end technologies, demonstrating proficiency in web development.

### ● Zoom & Whatsapp Automation

Created a Python-based automation script for Zoom and Whatsapp, utilizing the pyautogui and pywhatkit libraries. Developed the ability to automate repetitive tasks, showcasing proficiency in software automation. and used Tkinter for giving it GUI

### ● Bus Pass Automation System

Developed a Python-based Bus Pass Automation System with QR code scanning capabilities, using the pandas library for Excel-based database management. Created a user-friendly interface for scanning and validating QR codes

## CERTIFICATIONS

### ● Jetson AI specialist

I gained proficiency in developing and deploying deep learning model Attendance System Using Face Recognition on edge devices using NVIDIA Jetson platforms

### ● Hackerrank Pyton

demonstrated proficiency in Python programming through successful completion of coding challenges and assessments.

### ● IBM: Databases and SQL with Python

IBM Coursera: gained proficiency in working with SQL and databases, showcasing expertise in data manipulation and management. Demonstrated the ability to use Python to connect to databases and retrieve, analyze, and visualize data for real-world applications.
